

Franklin Fueling Systems

FLEXIBLE CONNECTORS

Flexible connectors allow you to easily make pipework connections in the tight spaces found within dispenser and tank containment sumps. Their flexibility and quick connection fittings make easy work of both installation and maintenance.

HIGHLIGHTS

- Easily connect a pipework system to other equipment like submersible turbine pump manifolds, shear valves, or even other types of pipework with secure, watertight connections.
- Completely customize a flexible connector to fit your application with a wide range of diameter, length, and end fitting connection options to choose from in either nickel plated steel or full stainless steel construction.
- Meet the real-world demands of contractors with our EZ Fit system which allows you to customize basic flexible connectors right at your parts counter.
